Minimum Operating System Requirements: Windows 98, Windows 98 Second Edition, Windows 98 SE... Signcut 1.07 (SignCut Pro 1.7) is the industry standard way of sending files from design software to an LCS / DSS compatible plotter (with DSS v7 software the plotter will accept a file without being connected to a PC). I am told that standard Windows file permissions are not sufficient for a formatted XPS file and that the Winrar program has to be used. This makes it harder for me to use the program. Is there any way around that? A: I'm surprised by your problem that doesn't affect most people, but I've tried the program and the author responded quickly, so you can try again. This issue should be addressed in the release Notes. The notes will be included in the next release. According to the release notes in SignCut Pro 1.7 the FAQ has been updated and I quote: If the plotter is not connected to the computer, how can I open the file? The file extension used for XPS is not recognised by the plotter, we recommend you save the file in another format and then use the Export function to send it
